

## **Applications**

Commercial lighting · indoor office lighting · decorative lighting · residential lighting

### **Descriptions**

LF-GIT040YA is a 44.1W isolated constant current flicker-free LED driver. Its input voltage ranges from 220-240V and its output voltatge ranges from 9-42V. Its output current is adjustable from 300-1050mA via DIP switch with every 50mA as a step. It is suitable for Class II light fixtures, including integrated track lighting.

Additional Remarks	<ol> <li>It is recommended that user install over voltage protection, under voltage protection and surge protection devices in the power supply circuits of light fixtures to ensure electricity safety.</li> <li>The PC cover, casing and end cap for assembling the LED driver in the light fixture must meet the fire rating of UL94-V0 or above.</li> <li>The LED driver used in combination with the end device is one of the accessories of the whole light fixture, and the EMC of the whole light fixture is not only susceptible to the driver itself, but to the LED light fixture and the whole light fixture's wiring. Thus, the manufacturer of LED light fixture should re-confirm the EMC of the whole light fixture before the whole light fixture is finished.</li> <li>The test conditions of the circuit breaker configuration quantity are the same as those of the inrush current.</li> <li>Note:         <ul> <li>① DC input is only for emergency with the maximum using time of 90 mins</li> <li>② @10uS</li> <li>③ 5 years@Tc≤81°C</li> </ul> </li> </ol>

# Transportation & Storage

#### 1. Transportation

- Suitable transportation means: vehicles, boats and aeroplanes.
- In transit, it is necessary to prepare awnings for rain or sun protection. Moreover, please keep civilized loading and unloading to prevent the vibration or impact of LED driver as much as possible.

#### 2. Storage

The storage of LED driver shall conform to the standard of Class I environment. When using LED drivers which
have been stored for more than 6 months, please re-test them firstly. Do not use them unless they are tested to
be qualified.

### Cautions

- Please use Lifud LED driver according to its parameters in the specification, otherwise the LED driver may malfunction.
- Using any incompatible light fixtures or those that have not been certified may cause fire, explosion or other risks.
- Man-made damage is beyond the scope of Lifud warranty service.

Remark: Lifud Tecnology Co., Ltd. reserves the right to interpret any contents of this specification.
